September Meeting Recap

Thank you to everyone who was able to join us for BOMA's September 28th Meeting:

**Rats & Mice: Their Impact and Control
Erik Hodson, Whitworth Pest Solutions**

With all of the press that bedbugs have received recently, one of the most common threats to property and public health has been overlooked as of late-rats and mice. This presentation was a reality check and a basic "Rodents 101" that described the common rodents we encounter in our area and ways to prevent them from becoming a problem in a structure. Also being presented was pictorial examples of conditions that favor rodent infestation and the damage that rats and mice can wreak upon homes and businesses alike.

Erik Hodson has been with Whitworth Pest Solutions, Inc. for 16 years and is the General Manager. Erik started at Whitworth in 1994 after graduating from Pacific Lutheran University with a B.S. in biology. In addition, he currently serves as Immediate Past President on the Board of Directors for the Washington State Pest Management Association. He is certified by the WSDA as a Commercial Pest Control Operator with 7 treatment categories. He also completed Purdue University's "Advanced Urban & Industrial Pest Management" course in 2009 and the National Pest Management Association Food Safety & Sanitation Workshop in 2006. Prior to attending college, he grew up in Spokane, has always lived in Washington State and always will.
